Profile

Aspiring software developer with hands-on experience through personal software projects, a start-up, and an internship. Strong focus on web and mobile application development using modern technologies. Currently seeking a long-term internship or an apprenticeship in the IT field.

Practical Experience & Projects

Founder & Software Developer – Own Start-up   *01/2025 – Present*

Product 1: Sustainable Marketplace App (discontinued)

As part of the start-up, a mobile application inspired by the "Too Good To Go" concept was designed and developed. The goal was to enable retailers to offer surplus or unsold products from the categories of clothing, cosmetics, and toys as discounted product bundles. The focus was on implementing application logic, user interface design, and basic backend functionalities such as user authentication and data structures. The project was consciously discontinued after the completion of the prototype phase.

Product 2: Quiz Verse – Quiz-Based Mobile App (current main project)

Quiz Verse is a mobile application currently under development, focusing on quiz formats and gamification elements. The app is built using React Native and is continuously extended. In addition to implementing frontend functionality, backend services such as authentication, database integration, and REST APIs are integrated. The planning, technical implementation, and ongoing development of the product are carried out independently.

Frontend Development Intern – abcfinlab   *06/2025 – 07/2025*

Worked in the frontend team with a focus on end-to-end testing using Playwright for an Angular application. Supported quality assurance processes, bug analysis, and independently familiarized with new tools and testing methodologies in a professional development environment.

Technical Skills

Frontend & Mobile**:** JavaScript, TypeScript, React, React Native (Expo), Angular (Testing)
Backend & Databases**:** Node.js, Express, MongoDB
Additional Technologies & Tools**:** Python, Java, Git, GitHub

Education

Comenius Gymnasium - Düsseldorf
Expected completion of Q1: 07/2026
Completion of the academic part of the University of Applied Sciences entrance qualification (Fachhochschulreife)

Languages

Russian & German (native) · English (good working proficiency) · Azerbaijani (good proficiency)
